Specialty Services.*

FIREPROOFING

For over 12 years RCS has been installing various types of Fireproofing for our clients in the Refining, Petrochemical, and Chemical Industry. Fireproofing is an essential line of defense, helping to mitigate factors that would escalate a fire, such as structural failures or overheating pressure vessels. We have the necessary expertise to identify the unique fireproofing needs of industrial environments, fully understand the complex performance characteristics of the products we apply, and deliver durable solutions that will endure the day-to-day rigors of the industrial sector.

Types of Fireproofing and Services

- Shop Applied and Field Block-outs
- Form / Pour and hand trowel
- Gunite / Spray applied
- Lightweight Cementitious
- Intumescent Epoxy Linings
- Sand / Cement
- Hybrid Systems
